

Software Requirements Specification (SRS)

Ultra-Minimal Daily Task Planner (Flutter)

1. Overview

1.1 Purpose

This document defines the requirements for a highly minimal, instantly usable daily task planner mobile application built using Flutter. The goal is to eliminate friction and allow users to immediately understand and act on their daily tasks.

1.2 Core Principle

Open app → instantly know what to do next

2. Platform & Technology

- Framework: Flutter
 - Target Platform: iOS-first (Cupertino feel), Android-compatible
 - Architecture: Feature-first modular
 - State Management: Riverpod
 - Storage: Local (Hive)
 - Backend: None
 - Offline-first: Yes
-

3. Project Structure

```
lib/  
├── core/  
│   ├── theme/  
│   ├── utils/  
│   └── widgets/  
├── features/  
│   └── planner/  
│       ├── models/  
│       ├── view/  
│       └── viewModel/  
├── branding/  
│   ├── theme/  
│   └── assets/
```

```
|   |— config/
|
|— shared/
|   |— theme/
|   |— assets/
|
|— main.dart
```

4. Branding & White-Label System

4.1 Shared (Generic)

```
shared/theme/
  colors.dart
  spacing.dart
  typography.dart

shared/assets/
  icons/
  images/
```

4.2 Branding (Replaceable)

```
branding/theme/
  brand_colors.dart
  brand_theme.dart

branding/assets/
  logo.png
  illustrations/

branding/config/
  app_config.dart
```

4.3 Rule

All UI must:

- Use shared defaults
- Allow overrides from branding

Changing only the branding folder must result in a new branded app.

5. Core Features (MVP)

5.1 Daily Timeline View

- Single main screen
- Vertical timeline
- Scrollable
- Displays tasks for current day

5.2 Add Task

- Floating action button
- Input:
 - Title (required)
 - Time (optional)

5.3 Task Types

- Timed tasks → placed on timeline
- Untimed tasks → shown in "Next" section

5.4 Smart Sorting

- Automatic arrangement of tasks
- No manual ordering

5.5 Next Task Highlight

Priority: 1. Active timed task 2. Next upcoming timed task 3. First untimed task

Must be visually emphasized.

5.6 Complete Task

- Swipe right to complete
- Smooth animation

6. Data Model

```
class Task {  
    String id;  
    String title;  
    DateTime? time;  
    bool isCompleted;  
    DateTime createdAt;  
}
```

7. UX Requirements

- No onboarding
 - No setup required
 - Single screen experience
 - Add task within 2 seconds
 - Always show next actionable task
 - No deep navigation
-

8. UI Design System

8.1 Style

- Ultra-minimal
- Flat design
- No heavy shadows
- No gradients

8.2 Components

- Rounded cards (radius: 16)
- Clean typography
- Generous spacing

8.3 Colors

- Neutral grayscale base
 - Brand color as accent only
-

9. Theme System

- Support Light and Dark mode
- Use Flutter ThemeExtension

Layering

1. Base theme (shared)
 2. Brand overrides (branding)
 3. System theme (light/dark)
-

10. Performance Requirements

- No network calls
 - No loading states
 - Instant UI updates
 - Use ListView.builder
-

11. Exclusions (V1)

- No authentication
 - No cloud sync
 - No categories or tags
 - No notifications
 - No analytics
-

12. Future Scope

- AI auto planning
 - Calendar integration
 - Smart reminders
 - Habit tracking
-

13. Acceptance Criteria

- User can open app and understand it instantly
 - User can add a task within 2 seconds
 - App always shows next task clearly
 - No crashes or UI lag
 - Branding can be swapped without code changes
-

14. Antigravity Execution Instructions

The system must:

- Generate a complete Flutter project
 - Implement defined architecture
 - Build UI as per spec
 - Implement state management
 - Persist data locally
 - Ensure smooth animations and responsiveness
-
-

15. Navigation & Entry Flow

- App launches directly into Main Timeline Screen
 - No onboarding screens
 - No authentication
 - No multi-screen navigation in MVP
-

16. Add Task UX Specification

- Tap Floating Action Button → opens bottom sheet modal
 - Modal contains:
 - Text input (auto-focused)
 - Optional time picker (minimal UI)
 - Add button (disabled if title empty)
 - On Add:
 - Task is created instantly
 - Modal dismisses automatically
-

17. Edit Task UX Specification

- Tap task → opens same bottom sheet
 - Fields are pre-filled
 - Options:
 - Update task
 - Delete task
-

18. Timeline Rendering Rules

- Timeline represents full 24-hour day
 - Timed tasks:
 - Positioned based on time
 - Untimed tasks:
 - Displayed in "Next" section at top
 - Overlapping tasks:
 - Use vertical stacking or slight offset
-

19. Empty State

- If no tasks exist:
 - Title: "No tasks today"
 - Subtitle: "Tap + to add your first task"
-

20. Data Persistence Behavior

- Load tasks on app launch
 - Persist on:
 - Add
 - Update
 - Complete
 - No background sync
-

21. Day Handling Rules

- Only current day tasks are displayed
 - No navigation between days in MVP
 - Tasks do NOT carry forward automatically
-

22. Animation Specifications

- Add task:
 - Fade + slide (200–300ms)
 - Complete task:
 - Slide right + fade out
 - Next task highlight:
 - Subtle scale (approx 1.02x)
-

23. Typography Guidelines

- Title: Large, medium weight
 - Task text: Regular weight, high readability
 - Time label: Smaller, muted color
-

24. Error Handling

- Add button disabled if title is empty
 - App must not crash under normal usage
-

25. Scroll Behavior

- On app open:
 - Auto-scroll to current time in timeline
-

26. Current Time Indicator

- Thin horizontal line across timeline
 - Subtle highlight color
-

27. Haptics (Optional but Recommended)

- Add task → light impact
 - Complete task → medium impact
-

28. ID Generation

- Each task must use UUID (not index-based)
